

# Secure hosting for your infrastructure

**Co-location allows you to avoid the CAPEX of building and maintaining your own facility, we provide the infrastructure you retain operational control over your equipment, data bases and software**

## Secure & resilient co-location services from Rockolo

**Are you looking for data centre facilities to host your critical IT infrastructure? One that allows you to select the services you need and connect globally to other infrastructures you may have or potentially need in the future.**

At Rockolo we provide a range of infrastructure co-location hosting solutions and our data centres are connected globally to over 25 point of presence (PoPs) in Europe, Africa, the Middle East and Asia via Rockolo's private global network. This allows you to connect your co-location platform to other infrastructure services you may have whether this is public, private or one of the global hyper-scale providers. Our global private backbone allows you to connect securely with the security and agility today's global corporations require and expect.

In today's interconnected world we would encourage our customers to have a multi-site policy whether this is local or geographically dispersed, you are only milliseconds away from most locations. This is beneficial for many reasons, disaster recovery needs, regulatory requirements, dispersed offices and ultimately to be closer to your customers.

**Co-location**

**Network**

**Private cloud**

**Public cloud**

**Hybrid cloud**

**Cloud connect**

**Cloud backup**

# Why use Rockolo ?

**Rockolo provides customers with best in breed data centre facilities, managed solutions coupled with fast and highly resilient global network connections needed by today's internationally connected organisations.**

**Rockolo's internationally expanding data centre footprint, head quartered in Gibraltar, is connected to many of the world's largest business and financial centres by the fastest and most reliable submarine cables.**

- State of the art facilities supported by over a decade of experience
- Flexible and scalable solutions designed to meet your budget and objectives
- On site and remote support capabilities
- Access to industry certified professionals who understand your business and environment
- Gibraltar based with international cloud platform
- Founder member of the Europe India Gateway (EIC) submarine cable consortium
- Personalised service
- Custom plans available

**Rockolo is a Gibtelecom group company**

## Why Co-locate with Rockolo?

Private co-location racks or suits are ideal when 100% uptime, high speed internet and security is required. Whether it's mission critical infrastructure, test & development or off-site back up and disaster recovery, you will have unrestricted access to your equipment 24/7:

## Benefits of co-location with Rockolo

- Geographically redundant Gibraltar data centre locations
- Rockolo data centres and network PoPs are joined resiliently to a global private network backbone
- Cost-effective scalability from one server to multiple racks
- Dedicated racks, cages or private suits available
- Redundant power, cooling and fast network
- 24/7 on-site security and support
- Managed network for high capacity Internet and MPLS
- A wealth of experience in providing clients with world class services
- Local expertise in provision of hosting services in highly regulated markets
- Multi-level support with hands on available

# European & North Africa Private Network

## Data Centres

1. World Trade Centre, Gibraltar
2. Mount Pleasant, Gibraltar

## Cloud Hubs

1. London, United Kingdom
2. World Trade Centre, Gibraltar
3. Mount Pleasant, Gibraltar

## Network PoPs - Europe

1. London, United Kingdom
2. Bude, United Kingdom
3. Lisbon, Portugal
4. Gibraltar
5. Madrid, Spain
6. Estapona, Spain
7. Marseille, France
8. Monaco

## Network PoPs - Africa

9. Tripoli, Libya
10. Abu Talat, Egypt

### Power

Powered by two independent feeds, each backed up by an N+1 UPS system. An N+1 generator bank ensures that the standby power is available in the event of a failure on the general mains power feed. All systems are monitored 24/7/365 to ensure a proactive approach to risk mitigation.

### Cooling

Cooling is provisioned by a supply of multiple independent high power, precision cooling units in an N+1 configuration. Cold aisle containment and other associated techniques ensure the maximum possible energy coefficient and smallest possible carbon footprint

### Fire Safety

All data centre suits are equipped with the latest fire suppression and HSSD (High Sensitivity Smoke Detection) systems, monitored 24/7/365 to ensure a proactive approach to risk mitigation, providing safe hosting environment for your IT infrastructure.

### Security

Our PCI DSS (Payment Card Industry Data Security Standards) certified data centres offer you peace of mind. The physical security, strict visitor protocols, electronic access control and CCTV systems, of your assets whilst at the same time enabling you 24x7x365 access is key to how we operate.

### Support

Rockolo's experienced customer support engineers provide proactive monitoring on-site and around the clock to ensure your business runs 24x7x365. Proactive monitoring of your infrastructure, networks and all on-site systems ensures effective risk to service mitigation.

### Multiple geographic sites

Multiple, geographically dispersed, networked state of the art facilities provide additional layers of resilience to your most valuable assets. All facilities provide same high levels of availability, security and support that you would expect from Rockolo.

# Key benefits to using a co-location partner

- Reduced expenditure both capital and operational and reduce in-house hosting costs
- Benefit from investment in infrastructure and technology
- A shared data centre offers economies of scale
- Reduce your organisation's carbon footprint

## Globally interconnected cloud services & hosting
